

ACCURE Underground Solutions LLC

Capability Statement

Experience You Can Build On

Creating Confidence in What Lies Beneath.

ACCURE Underground Solutions LLC is an Indigenous woman-owned utility designation and Subsurface Utility Engineering (SUE) support firm based in Pembroke, North Carolina. We partner with engineering firms, municipalities, utility owners, contractors, developers, and public agencies to identify underground utility conflicts before construction begins—reducing risk, preventing costly utility damage, and improving project outcomes.

Core Capabilities

- Utility Designation (ASCE 38 QL-B)
- Electromagnetic (EM) Utility Designation
- Ground Penetrating Radar (GPR)
- Utility Conflict Identification
- Utility Mapping
- Bluebeam Utility Deliverables
- Existing Utility Documentation
- Utility Coordination Support
- Project Consultation

Why ACCURE

ACCURE combines decades of underground utility experience with advanced locating technology to help clients identify conflicts before they become construction delays, change orders, or damaged infrastructure.

Markets Served

Engineering Firms • Municipal Governments • Tribal Governments • Universities • Community Colleges • Utility Companies • Transportation Agencies • Commercial Developers • Industrial Facilities • General Contractors

Representative Project Experience

Lumbee Tribe of North Carolina – Highway 711 Campus
Four-building campus (~30 acres). EM designation, GPR investigation, documentation of water, sewer, storm drainage, electrical, telecommunications, fiber optic, and irrigation systems, utility conflict identification, and Bluebeam mapping deliverables.

Client Recommendation

"Over the last ten years I have known Wendy and collaborated on residential and commercial work... I confidently recommend her for contractor tasks and quality services."

Dave McGirt

Planning & Development Manager, Lumbee Tribe of North Carolina
